

## Classic

Classic is a decorated porcelain wall and floor tile. The designs come from the late 19th century. The motifs commonly found on cementine tiles of the era are faithfully reproduced on this series. There are two colour options which are Classic with bold bright colours and Grey, a quiet neutralised alternative. Because the four size options are modular, they can fit together as a mix. Use the four tile sizes together makes a fully random patchwork. In contrast one size will offer a more regular mix of pattern. Classic has a surface texture like a fine grid of pyramids. As a result the surface has a textile look and feel. Each size option has a set of patterns unique to that format. All tiles come in boxes of mixed patterns with the exception of the 600x600mm size. This is the only size option with a choice of pattern.
