

# Terracotta

Terracotta tiles have been covering floors, walls and pavements for millennia. This traditional material has come a long way from its baked red origins. Because of its enduring appeal, terracotta has become so much more than a material choice. Our ranges continue to grow with glazed and plain options to use on the wall and floor. Modern glaze technology gives the C-Plus series the tough qualities needed for floors in busy areas. There is also a warmth to the unique finish of terracotta that has no rival. As a result mass produced look alike materials cannot compare. Browse our collections [here](#).
