

Classic

Classic textured porcelain tiles have a joyful mix of patterns that disguise their textured surface. Classic mixes pattern to create an intricate patchwork effect. Each of the size options is a set of patterned pieces. Because the sizes are modular, both pattern and size can combine to maximise the mixed effect. As a result Classic creates a riot of pattern that can easily disguise the smallest of floor spaces. Classic textured patterned floor tiles work with a broad variety of other tiles and materials. They are easy to pair and make a fun floor or wall finish. Put Classic with a period wall feature for a modern twist on a traditional look. In contrast use Classic on the floor with a plain coloured ceramic wall tile.
